Hazard : Stem may develop cracking at the faceplate or stem body which may lead to failure of the stem securely holding the handle bars to the bicycle, potentially resulting in the rider losing control.

Remedy: Consumers with a bicycle equipped with a recalled stem should immediately stop using the bicycle and contact the nearest Authorised Cannondale, GT Bicycles and Mongoose Dealer. Cannondale, GT Bicycles and Mongoose Dealers will inspect the bicycle stem to check the date stamp and determine if the stem has been recalled. If it has been recalled a new stem will be provided.
